

Goals: to increase 'team visibility' at the hack night and to make it easier for new members to approach teams by implementing (1) project shout out and project names on the whiteboard (2) team ambassador badge on the arm (3) visible team banner

Summary

- Overall positive
- **Make project shout out at the orientation more concise** - by reminding team leads to use 2 sentences to describe their projects, rather than becoming a project pitch session
- **Visible team banner-** by reminding team leads to put up 'VISIBLE' signs (some are hard to see)

Detailed feedback from project team leads

- Project announcement seemed to take longer than expected. - Jaoyi (Research)
 - Suggestions: team name + 1-2 sentenced mission statement/ description
- The arm-badge and the signs are great and necessary. The active projects session saves a lot of time. - Jude (Data Science)
- The signs was not communicated that well, didn't even know that we were doing this. The signs were not entirely visible or even noticed. Stands for team signs?(Like ordering food at a restaurant kind of stands) - Mark (Bridge)
 - Suggestions: communicate about 'VISIBLE' signs
- The arm-badge and the signs are great and necessary. great. Active project session were taking a bit too much time. Seemed to be a mini pitch session. - Paul (SF Crime Data)
 - Suggestions: make the session more concise by reminding people to use 2 sentences to describe 'project name' and 'project mission'
- The active projects on the whiteboard is great and needed for new members. Data from that can be collected towards BrigadeHub check-in system. Ideally, the BrigadeHub check-in system will just be displayed during opening remarks and the list of active projects will be displayed digitally. - Ozzy(BrigadeHub)
