Interview

Hello, I am ____ from the research group at c4sf. We are working on improving new member experience at the hack night. Can I ask you a few questions?

1. What is your background?

2. What brought you to c4sf?

3. Can you tell me about your experience step by step starting from the time you arrived at the door?
Your experience can include your thoughts and feelings, things you enjoyed or things found difficult. We are using your feedback to improve new member experience, not to judge you as a new member. You should also feel free to share anything even if its negative.
